Re: FCC Docket 92-235

Dear Sir or Madam:

I am informed that the FCC has proposed certain regulatory changes that will substantially reduce private radio transmitter power. As one of Oregon's largest private employers with manufacturing operations located in different areas of the state, we believe the rules requiring reduction in transmitter power will negatively impact the radio dispatch communications required for security and facilities operations. Maintaining existing capacity under the proposed regulations would result in dramatically increased expenditures or substantially reduced service levels. Therefore, we wish to object to the adoption of the proposed regulations.

Cordially,

James F. Dalton
Attorney

JFD/laq
